

END-TO-END DATA CENTER SERVICES

The data center experts at World Wide Technology understand that each business has unique needs. That's why we use proven methods to plan, design, implement and optimize your data center environments. With this solution-based approach, our certified engineers provide end-to-end data center solutions, leveraging the best-of-breed technology based on your business needs and data center infrastructure.

CAPACITY PLANNING: Let WWT fully evaluate your data loads, usage trends, anticipated bandwidth and storage needs to ensure that you have the data center capacity to meet your long-term computing goals. Our certified experts can help you predict the computing resources your team needs to succeed, and cut costs by putting a stop to reactionary purchases of quick-fix hardware and software solutions that often fail to provide the scalable infrastructure you require.

STORAGE & SYSTEM OPTIMIZATION: Create a flexible and efficient storage infrastructure and improve user access to vital applications with WWT. We can help you lower long-term storage costs, plan and implement business continuity and disaster recovery solutions as well ensure compliance with the toughest storage-related regulations.

EXCHANGE SERVER & FILE SYSTEM ASSESSMENTS: Better manage the explosive growth of file system and Exchange information with WWT. We're here to address current challenges and optimize both your Exchange server and file system needs to drive productivity, improve storage and information management while tightening security across your organization.

TAKE ON TODAY'S MOST COMPLEX DATA CENTER CHALLENGES WITH WWT.
