

# IN THE DATA CENTER

**New technologies, fast growth, acquisitions, data explosion and increased security concerns have driven data center complexity up and utilization rates down.** Expand your data center capabilities, security and capacity with cutting-edge technology and expertise from World Wide Technology (WWT) and Sun Microsystems. We're here to help you:

**OPTIMIZE YOUR DATA CENTER:** With emerging virtualization and consolidation technologies from WWT and Sun™, you can integrate multiple heterogeneous computing environments, reduce power costs and still meet increasing demands to deploy mission-critical applications.

**SECURE DATA ASSETS:** Sun incorporates security into each step of designing a data center or application and WWT's certified experts are ready to help you incorporate Information Lifecycle Management (ILM) and Identity Management (IdM) solutions to secure your valuable data assets.

**IMPROVE PERFORMANCE & GO GREEN:** Improve the ROI of your data center assets and take on skyrocketing energy costs with new high-performance energy-efficient technologies from Sun and WWT, which enable higher utilization levels while balancing the space, power and cooling demands of today's data centers. With Sun and WWT, it's easy to build lean and green data centers that deliver higher service levels at lower costs.

## EXPAND YOUR DATA CENTER CAPABILITIES, SECURITY AND CAPACITY WITH WWT AND SUN.

### WWT AND SUN DELIVER:

- Data Management Solutions
- Secure IT Network Services
- Business Compliance Solutions
- High-Performance Computing
- Certified IT Experts & Training
- 24x7x365 Support

### KEY BENEFITS

- Enhance Security
- Protect Data Assets
- Ensure Compliance
- Reduce Costs & Complexity
- Improve Performance and Energy Efficiency

## GET SMART

Look to WWT and Sun for hands-on, real-world expertise in architecting, implementing and managing your data center for optimal performance.

Our certified professionals can help you simplify your data center with products, technologies and services that offer ease of deployment, better resource utilization, higher levels of dependability and lower total cost of ownership throughout the life of your systems.

# IN THE DATA CENTER

## WHY WWT?

WWT provides a unique blend of proven technical expertise, scalable solutions and flexible service level agreements to our commercial enterprise and federal clients. We take an informed, consultative approach to developing, deploying and maintaining the right advanced technology solutions for you and your budget.

## A POWERFUL PARTNERSHIP

A Sun Microsystems partner since 1992, World Wide Technology has achieved the highest levels of product and service certifications offered by Sun. And, as an Executive Member partner, WWT has the expertise and experience to design, deliver, install and maintain any solution in the Sun data center portfolio.

## AN IMPRESSIVE PORTFOLIO

Through Sun Microsystems, World Wide Technology offers a rich portfolio of data center solutions and services designed to help you enable robust, energy-efficient data centers across even the most disparate environments, including:

- **Sun Fire™ Servers:** Meet your workload requirements with vertically scalable, highly reliable Sun Fire servers designed for mission-critical network computing in the heart of the data center.
- **Sun's x64 Systems:** Sun's x64 product line lets you use the Operating System of your choice, be it Windows, Solaris or UNIX. Get high-performance with low power consumption to cut data center power, space and cooling costs.
- **Sun StorEdge™:** Sun StorEdge solutions of hardware and software are tightly integrated with Sun servers for the greatest application performance and reliability, and support heterogeneous environments for investment protection.
- **Sun Java™ Systems:** Sun offers a complete portfolio of highly integrated and affordable, open interoperable, end-to-end software systems for the data center.

## GET STARTED TODAY

Call us at **800.432.7008** to join the growing number of global business leaders benefiting from World Wide Technology's Sun Microsystems Executive Partner status, certified technical expertise and superior physical infrastructure today.

## ABOUT WWT

World Wide Technology, Inc. (WWT) is a leading Systems Integrator providing technology and supply chain solutions to customers and suppliers around the world.
