

## The right technology makes it possible. The right people make it happen.

Founded in 1990, World Wide Technology has grown from a small startup to a world-class organization with over \$2 billion in revenue and more than 1,000 highly trained employees. The secret of our success? We provide our customers with a lot more than technology.

Talk to some of our customers in the federal government, for example, and you might hear we're experts at increasing productivity and improving communication.

Talk to some of our customers in the Fortune 500, and they might say we're the guys who can keep even the most complex supply chains running smoothly and efficiently.

And just about anybody can attest to our professional services, because whether we're handling logistics and procurement, enhancing a network or enabling eCommerce integration, we're exceptionally responsive to our customers' needs and committed to the highest standards of quality.

Sure, we have all the latest and greatest technology along with more than 1.6 million square feet of warehouse, distribution and integration space. But what truly sets us apart is our team of certified professionals, every one of whom is committed to understanding our customers' long-term goals, and ensuring they achieve them.
