

THE RIGHT TECHNOLOGY MAKES IT POSSIBLE.  
THE RIGHT PEOPLE MAKE IT HAPPEN.

Founded in 1990, World Wide Technology has grown from a small startup to a worldclass organization approaching \$3 billion in revenue and over 1,200 highly trained employees. The secret of our success? With our relentless focus on our people, processes and partnerships, we provide our clients with much more than technology.

We know that deadlines can't shift, your business can't slow down — and just how to overcome the obstacles that always pop up. Talk to some of our customers in the federal government, for example, and you might hear we're experts at increasing productivity and improving communication.

Talk to some of our customers in the Fortune 500, and they might say we're the guys with the virtualization expertise and experience that allows us to design data center technologies and solutions with an architectural, independent and multi-vendor approach.

Whether we're handling logistics and procurement, enhancing a network or enabling eCommerce integration, we're exceptionally responsive to our customers' needs and committed to the highest standards of quality. In addition, our facilities infrastructure team and professional services offerings allow our customers to focus on their top priorities while maximizing technology investments.

Sure, we have all the latest and greatest technology along with more than 1.5 million square feet of warehouse, distribution and integration space. But what truly sets us apart is our team of certified professionals, every one of whom is committed to understanding our customers' long-term goals, and ensuring they achieve them.
