

SUPERCHARGE COLLABORATION

As the leading Unified Communications systems integrator in the U.S., World Wide Technology delivers the tools, technology and expertise you need to supercharge collaboration across your organization. We hold the coveted Cisco Masters Certifications in Unified Communications and Security, which means we have both the advanced technology skills and demonstrated customer success in designing, deploying and providing services for the most sophisticated Unified Communications solutions available today. Turn to WWT when you're ready to:

STREAMLINE COMMUNICATIONS: WWT's Unified Communications solutions allow employees, customers and business partners to collaborate in real time using advanced applications like video conferencing, integrated voice and Web conferences, mobile IP soft phones, voicemail and more – all from one easy-to-use interface.

MAXIMIZE PRODUCTIVITY: By integrating the expansive functionality of Unified Communications directly into Enterprise Resource Planning (ERP), Customer Relationship Management (CRM), Material Planning and Purchasing along with Supply Chain Management, you can transform business processes and maximize operational productivity.

IMPROVE DECISION MAKING: With Unified Communications from WWT, you can finally optimize disparate voice, video, data and mobility applications – and put an end to misdirected communications that delay decisions and hamper productivity. Improve decision making by ensuring that the right information gets to the right people at the right time.

CUT COSTS: A new Unified Communications system is typically costs the same or less than upgrading a current TDM or digital system plus provides long-term investment protection from end of support issues and substantial capabilities for enabling new business processes based on open standards.
