

Webex Suite

Everything your business needs to collaborate in the world's first purpose-built, best-of-breed suite for hybrid work.

Webex Suite is a comprehensive collaboration and communication solution that enables equitable experiences for everyone while protecting your data with industry-leading security. It provides calling, messaging, meetings, asynchronous video, polling, whiteboarding, webinars and event management in a unified experience across web, desktop and mobile apps. Webex Suite address the needs of every type of business, while anticipating and accommodating future needs. It enables equitable collaboration experiences for everyone, whether they work from the office, their home, or another part of the world. And it is backed by Cisco's industry-leading security and networking infrastructure while providing a single pane-of-glass management portal for all apps, devices and sites.

Everything needed for hybrid work and hybrid events

Comprehensive solution creating more equitable and secure collaboration, hybrid work and hybrid events

Calling

Keep colleagues and customers close with a complete cloud phone system built to make and receive business calls on any device. Experience enterprise-grade calling features and crystal-clear audio and video with robust security that is globally available.

Meetings

Create more engaging meetings with innovations like immersive share, more supportive experiences with AI driven innovations like advanced background noise cancellation and deliver more inclusive collaboration with features like real-time language translation.

Messaging

Meet less and get more done with Messaging in Webex. All your messages, contacts, files, content and meeting artifacts like recordings and transcripts are stored in one app for seamless continuous collaboration before, during and after meetings.

Polling

Enable more interactive experiences with participants before, during and after meetings. Foster an inclusive culture by empowering everyone to ask questions and respond to polls. Facilitate team bonding and build trust across the organization in a hybrid environment.

Webinars

Simplify audience delivery with intuitive, engaging webinars that scale with your business. Deliver virtual events with confidence by simplifying event management, practicing before presenting, and setting the stage for success.

Events

Bring together software, hardware, and services to create the most robust, flexible hybrid events experiences. Manage events across the entire lifecycle using powerful event software, hardware, & services tools—all while showing proven ROI for each event.

Vidcast

Deliver your messages asynchronously with our video messaging tool that makes it easy to record, edit and share short videos widely. Audiences can share feedback on moments that resonated with them through comments and reactions.

Whiteboard

Get everyone on the same page with one unified whiteboard integrated into all your Webex workflows. The Webex Whiteboard has all the tools you need to co-create, create structure, or let your ideas flow freely.

Benefits

Comprehensive Capabilities

Addresses collaboration and communication needs of every type of business, while anticipating and accommodating future needs.

- Single, unified app experience across synchronous and asynchronous modes, i.e., calling, meetings, messaging, polling, whiteboarding and more
- Effortless collaboration with people outside your organization, while complying with your data security and privacy policies
- Frictionless bi-directional integrations with the most popular 3rd party business apps for more efficient workflows (e.g. Salesforce, HubSpot, Jira, ServiceNow)
- Seamless access to an extensive ecosystem of 3rd party apps specialized for collaboration use cases from within Webex (e.g. Miro, Mural, Smartsheet, etc.)
- Comprehensive in-person, virtual and hybrid event management capabilities for multi-day, multi-track, multi-session conferences

Secure Communication

Backed by Cisco's industry-leading security and networking infrastructure while providing a single pane-of-glass centralized management portal.

- Centralized management portal that enables IT admins to manage all Webex services and monitor end user adoption to maximize return on your investment
- Zero Trust identity verification, end-to-end encryption and real-time data loss prevention options provide industry-leading security and data protection
- Webex dynamically optimizes network traffic to always provide the best quality video and audio, regardless of location, device or internet connection
- Webex has 47 data centers around the world and ensures compliance with regional and local data residency and privacy regulations and policies
- IT admins can easily configure and enforce data governance policies, with granular controls covering the entire company down to individual users

Collaboration

Enables equitable collaboration experiences for everyone, whether they work from the office, their home, or another part of the world.

- Bridge the gap between office and remote workers with innovations like background noise removal, voice optimization and digital whiteboarding
- Remove language as a barrier to communication with automated real-time language translation in 100+ languages and unlimited number of live interpreters
- Overcome time zone differences and meeting conflicts with vidcast, messaging and meeting recordings, transcriptions, highlights and action items
- Bring your distributed workforce closer together with interactive audience engagement tools like polling and Q&A embedded seamlessly into your meetings
- Empower your workforce with private collaboration insights that can help improve productivity, enhance work-life balance and build stronger connections
