

Connect the dots for your app-first world

Cisco on AWS | Full-Stack Observability

500M new apps will be written in the next 3 years.¹

96% of technologists say full-stack observability will help them make sense of what's relevant and take action for better business outcomes.²

85% of consumers say that apps are absolutely essential to their daily lives.³

66% of users say they would avoid a brand completely if their experience isn't perfect, there's little room for error.⁴

Apps are the front door to evolving and expanding digital experiences. Cisco helps you deliver apps with optimal performance faster while AWS accelerates migration and reduces risk.

Full-Stack Observability by Cisco provides full-stack visibility and transforms data into actionable insights, so you can provide exceptional digital experiences quickly and cost-effectively.

Cisco AppDynamics

Monitor customer-facing applications right down to your core network and infrastructure to fix performance issues before they affect customers and business. Align, prioritize, isolate, and remediate based on what matters most to your business.

Cisco Secure Application

Protect business-critical applications to maintain speed and uptime while balancing risk with Cisco Secure Application in AppDynamics.

Cisco ThousandEyes

Gather telemetry across the digital stack highway with Cisco ThousandEyes. Connect users and services and collect performance data and routing behavior to track impacts on application availability.

Cisco Intersight Workload Optimizer

Keep your apps running at peak performance with deep visibility across all layers of the application stack, AI-powered analytics, and automated actions. Maximize application performance while minimizing cloud costs.

Real-time visibility and deliver exceptional digital experiences with full-stack observability solutions by Cisco on AWS.

- ✓ Resolve app functionality issues in minutes with performance monitoring.
- ✓ Reduce risk with complete visibility and control.
- ✓ Lower costs with pay-as-you-go pricing.
- ✓ Accelerate innovation with optimized workloads.
