

Customer Procurement Punch Out Experience

- **What do we need to get started?**

- Kick-off call with customer
 - Align on Integration Expectations
 - Defined Test Scenarios
- Connectivity established with the customer's Procurement Tool.
- Predefined list of products and agreed-upon pricing with the customer.

- **What is the average timeline for implementation?**

- Establish connectivity with customer's procurement system in test and production environments.
 - Test 1-2 scenarios with the customer.
 - Customer to sign off on UAT.
 - WWT ISR update agreed upon products in production catalog.
 - Grant users access provided by the customer to application in production.
- = 4-6 weeks (Note: This is dependent on customer response time and UAT.)
