TEST LABS SERVICES PORTFOLIO

- Proofs of Concept
- Verification
- Interoperability
- Performance Evaluation
- Scalability Validation

TEST RESULTS AND ANALYSIS

Results from the ATC Test Labs are measured using a standard methodology and reporting process.

WWT delivers test results using a variety of formats including scorecards and custom matrices.

WWT also offers general matrices to help customers determine which tests are required for particular workloads and which are not. Matrices are based on large samples of tests performed across particular technology areas.

ATC TEST LABS OBJECT STORAGE

Multi-vendor Showcase Designed to Simplify the Complex

To keep pace with advancements in technology, customers must explore and evaluate features, functionality and cost to validate potential solutions. World Wide Technology's (WWT) Advanced Technology Center (ATC) Test Labs offer services designed to offload expensive and time-consuming internal test processes and assist in solution development.

▶ MULTI-OEM CAPABILITIES

In addition to the following strategic partners, our ATC has technology from industry-leading OEMs, including alpha and beta status equipment that has not been released for general availability.

▶ REDUCE RISK, COMPLEXITY AND TIME

The ATC Test Labs infrastructure can be custom built according to the exact requirements and parameters of your network, collaboration, security and data center environments. Sandbox environments are designed to address your business challenges in a write-erase state.

- Apply industry-standard testing tools and load generation
- Evaluate solutions based on real world features and performance
- Ability to do multi-site latency injection

▶ QUALITY ASSURANCE FOUNDATION

- Test Labs service concept rooted in quality assurance processes that customers follow internally
- QA lifecycle milestones and artifacts form the procedural structure and language for test engagements
- Structured common lifecycle process for requirements gathering, test case creation, review and execution
- Formal exit criteria established

▶ GET STARTED TODAY

Call us at 800.432.7008 or visit www.wwt.com to find out how your organization can use the ATC Test Labs.

▶ TEST LABS FOCUS: OBJECT STORAGE

WHY OBJECT STORAGE

- Plethora of unstructured data: Today 80 percent of data is unstructured and growing
- Object is the new NAS and DEV platform
- Object storage is “cheap and deep”
- Reduce facilities costs by employing game-changing technologies

DEDICATED OBJECT STORAGE TEST ENVIRONMENT INFRASTRUCTURE

The ATC object test environment includes in excess of 30 purpose-built nodes to emulate any customer defined scenario.

In order to verify features and functionality, evaluate performance and validate scalability, the ATC Object test environment can be configured according to customer-defined use cases.

OBJECT STORAGE BENEFITS

Data Protection. Redundancy and high availability by erasure coding and replication across a geographically disbursed infrastructure.

Storage Costs. Control storage cost through use of commodity-based hardware and specialized SDS (software defined storage) software.

Unlimited Scalability. Exabyte scale across multiple data centers in a single global namespace.

Management. Ability to scale capacity without additional manpower

ABOUT WWT

Through its culture of innovation, World Wide Technology (WWT) inspires, builds, and delivers business results, from idea to outcome.

Our customers have hands-on access to cutting-edge big data, cloud, collaboration, compute, mobility, networking, security, software and storage products in our Advanced Technology Center; technical expertise from our expansive team of engineering resources; and accelerated global product delivery, powered by a sophisticated supply chain management infrastructure.

By working with a financially strong, privately held systems integrator with more than \$7 billion in annual revenue that ranks among the top tier of partners with Cisco, HPE, HP, EMC, NetApp, VMware and F5, our customers realize the benefits of saving time and money while significantly minimizing risk.
