Advanced Technology

Our Advanced Technology Center (ATC) at World Wide Technology provides customized, technical solutions in a testing environment to leverage collaboration in network mobility, cloud and storage computing, security, big data and more to optimize client experience. This internship is designed to educate and apply knowledge in a hands on environment, contributing to business requests. As an intern, you will gain a better understanding of how this division fulfills client expectations. Intern responsibilities include, but are not limited to:

- Fulfill ATC rack/stack/cable requests
- Inventory management
- Conduct data center maintenance
- Oracle project creation
- Prime project closing
- Duplicating project status information between Service Now and Salesforce
- Attend regular meetings with manager and mentor
- Perform other technical tasks as assigned
- Participate in program training and professional development sessions
