

STAY A STEP AHEAD

EVERY DAY CYBERSECURITY THREATS GROW MORE COMPLEX, AS DO THE TECHNOLOGIES USED TO COMBAT THEM. WITH ANOTHER MAJOR SECURITY BREACH IN THE NEWS EACH WEEK, IT IS MORE IMPORTANT THAN EVER THAT ADVANCED SECURITY MEASURES ARE BUILT INTO EVERY ASPECT OF AN ORGANIZATION'S IT INFRASTRUCTURE. WWT HELPS OUR CUSTOMERS PROTECT THEIR REPUTATIONS, BUSINESS ASSETS AND INTELLECTUAL PROPERTY BY ACCELERATING THE MATURITY OF THEIR SECURITY POSTURE.

SECURITY TRANSFORMATION

WWT approaches security transformation using every component of an enterprise security posture: security architecture, next-generation firewall (NGFW) platform, endpoint protection, enterprise segmentation, and identity and access management.

SECURITY ARCHITECTURE

Security Architecture comprises all integrated design artifacts that describe the services and capabilities needed to deliver security controls and reduce risk for an organization. Taking this type of wholistic approach to security helps connect business goals and objectives to technical solutions, and leads to more effective outcomes while aligning with overall enterprise architecture efforts.

OUR CORE CAPABILITIES:

Strategy: Governance, Standards, Risk Management, Compliance

Operations: Readiness, Effectiveness, Threat Management

Solutions: NGFW/Platform, Endpoints, Segmentation, Identity, Cloud

NGFW PLATFORM

WWT transforms traditional next generation firewall solutions into more centrally managed and visible security platforms that can consistently protect against threats. Our goal is to streamline the design, implementation, management and evolution of NGFW platform architectures to establish security awareness, optimize defense capabilities, improve threat response, mitigate breaches and close compliance gaps.

OUR CORE CAPABILITIES: Cloud/Cloud Access Security Broker (CASB), Encryption, Enterprise Segmentation, Intrusion Detection Systems (IDS), Intrusion Prevention Systems (IPS), NGFW/Platform, Threat/Sandbox

SECURING ENDPOINTS

Despite all the effort and resources that organizations invest in traditional information security approaches, they still succumb to cyber threats or find that they are unprepared to manage the rapidly blurring boundaries of the enterprise's perimeter. With the ubiquitous adoption of portable devices, the notion of a "moat" around a company's perimeter is gone. The endpoint is the new perimeter and the target of every attack.

OUR CORE CAPABILITIES: AV/NGAV, IR/Forensics, Operational Management, DLP/Encryption, Host FW/IPS, Browser Isolation

ENTERPRISE SEGMENTATION

While flat networks provide easy access to critical information, they also lack protection for your systems and data. Enterprise segmentation helps address this weakness. It provides more protection for your enterprise once an attacker is inside and matures your architecture to a higher level of cybersecurity capability.

OUR CORE CAPABILITIES: Strategic roadmaps, reference architectures, solution design/selection, implementation services

IDENTITY & ACCESS MANAGEMENT

WWT's goal is to streamline authentication and access for better employee experience and greater control of organizational data and systems. Managing identities continues to be a top priority for most organizations. Our Identity & Access Management team helps simplify the complex, provides scalable architecture and strategic roadmaps, and implements solutions that define access based on security requirements of each resource and classification of data.

OUR CORE CAPABILITIES: Lifecycle Management, Privilege Access, ISE/NAC, Authentication, SSO/MFA

ABOUT THE WWT SECURITY PRACTICE

Our industry-certified security professionals include former CISOs, CIOs, security analysts, architects and engineers.

Our conversations initially focus on understanding customer use cases. Then we test various scenarios in WWT's IT innovation ecosystem, known to the industry as the Advanced Technology Center (ATC), to help customers with complex environments compare competing solutions and, ultimately, make the right decision based on impartial advice.

60+

SECURITY PROOFS OF CONCEPT AND DEMOS ANNUALLY IN THE WWT ADVANCED TECHNOLOGY CENTER

100+

PARTNER ECOSYSTEM FOR ENDLESS INTEGRATIONS

WHO WE ARE

Founded in 1990, now 5,500+ employees around the world
Eight years in a row on FORTUNE “100 Best Companies to Work For®” list
Three years in a row on Glassdoor’s “Best Places to Work” list
Ranked #11 on FORTUNE “40 Best Workplaces in Technology” list
#1 partner with Cisco, Dell EMC, NetApp, VMware, F5, Intel, Palo Alto, Fortinet, Pure Storage and Infoblox
Technology provider to more than 50 of the FORTUNE 100
\$2.1 billion in international revenue

VISION

To be the best technology solution provider in the world

MISSION

To create a profitable growth company that is also a great place to work

CORE VALUES • THE PATH

Trust in character and competency
Humility - stay grounded; never forget where you come from
Embrace change and diversity of people and thought
Passion and a strong work ethic
Attitude - be positive and open-minded
Team player - proactively share ideas
Honesty and integrity in everything we do

REVENUE

With \$11.2 billion in annual revenue, WWT is a financially strong, privately held technology solution provider.

STRATEGIC PARTNERSHIPS

Global Architectural Excellence Partner of the Year for Enterprise Networks (2018, 2016)
Americas Customer Experience Partner of the Year (2018)
Americas Public Sector Partner of the Year (2018)

Partner of the Year (2018)

Top Partner of the Year (2018)

Microsoft Gold Partner

ADVANTAGE PARTNERSHIPS
